Summary

Software engineering undergraduate with a firm understanding of software engineering processes, principles, and technologies. Experience with multiple programming languages, testing, version control systems, object-oriented programming, and graphical user interface design via personal software projects and university programming assignments.

Skills

Languages

Java   Python   C   HTML   CSS

Technologies

git   JUnit   JaCoCo   JavaFx   PyQt   SonarQube

Software

VS Code   Eclipse Oxygen   Adobe Creative Suite

Projects

Verdite	Automatic git-powered version control system
realloc	Web-based tool to allocate university tutors to classes (hackathon project)
GraphGUI	Specialised drawing program for undirected graphs
truthtable	Tool to generate truth tables for arbitrary boolean expressions

Experience

Incitec Pivot Limited
October 2016 - November 2017
Projects Assistant

Provided support for project managers in various aspects of ongoing and completed projects in a large-scale manufacturing setting. Tasks included recording plant structural improvements, devising bills of materials, and reviewing plant SAP database and project drawing consistency. Processed and archived project documentation. Assisted in multiple facets of projects administration, including invoicing and office support.

Self-Employed
July 2018 - Present
Private Tutor

Provide tuition for university students undertaking software engineering and computer science courses, notably the introductory Python and Java courses at the University of Queensland.

Volunteering

4ZZZ Community Radio Station
April 2015 - Present
Radio Announcer

Operate broadcast console. Speak on-air to audience and with guests and other announcers. Interface with station management and announcers. Assist in organisation of music events.

Education

University of Queensland
2016 - Present
Bachelor of Engineering (Software)
